

Global@Venice  
Post-doc Fellowship at Ca' Foscari University of Venice

**Expression of Interest**

**1. Interested institution (legal person):**

Ca' Foscari University of Venice

**2. Department/Centre:**

Department of Management

Bliss Digital Impact: develops academic and applied research exploring the manifold impact of the digital transformation on citizens, consumers, firms, organizations, cities and society as a whole. BLISS' research focuses on opportunities and risks inherent to digital transformation for both data-intensive organizations as well as organizations that have not undertaken a full transition to the digital economy yet. In this regard we are not only interested in the strategic, organizational and business dimension of the digital transformation, but also we intend to understand its ethical implications, its effects on organizations' social responsibility, and on environmental sustainability.

Sustainability Lab: aims to become a point of reference for the dissemination of the results of academic research on corporate sustainability to companies, professionals and communities. From a management perspective, sustainability is understood as the creation of shared value in the long term both for a company as well as for a wider range of stakeholders. As such, sustainability relates to business and operational practices aimed at improving the competitiveness of a company while at the same time promoting environmental, social and governance (ESG) conditions in the communities in which it operates.

**3. Position, scientific requirements, topic, scientific panel:**

**Position:**

Assistant Professor  
(RTDB)

**Scientific requirements:**

PhD in Management

The fellow should have experience in Sustainability, Supply Chain Management, Systems Approach and Education for Sustainability

The fellow should have leadership abilities and international experience in research and/or teaching in all levels of teaching from undergraduate courses to PhD disciplines.

**Topic(s):**
