- 1) The internal fee can be only applied to Ca' Foscari's internal structures in case of:
- 1.1) meeting activities and subject to a declaration attesting to the absence of any contribution (ex. fees, subsidies). In addition, it is necessary to provide a declaration attesting that the event/meeting has been/will be organized exclusively by the applying internal structure (for example Departmental meeting or seminar organized by the Department, research projects, etc.)
 - 1.2) institutional and/or educational activities on behalf of a third party as frontal lessons. It is necessary to provide a declaration attesting that the project fees on behalf of a third party. This fee type includes all the educational activities as frontal lessons related to projects on behalf of a third party (but not events related to the same project, as for example dinners, meetings, galas, receptions, exhibitions, performances). The internal structure will have to pay the University 9% and 6% of the revenues from the entire project as defined in the final account, in addition to the payment of the internal fee for temporary use of university spaces, when required.

2) The intermediate fee can only be applied to internal Structures in addition to the declaration of the internal university structure (Department, Centre, ect.) that certifies that the activity is promoted by applying the internal structure. This fee type includes initiatives related to educational activities with reference to projects on behalf of a third party (for example conventions, dinners, meetings, galas, receptions, exhibitions, performances, ect.). A declaration attesting the contribution by third parties and/or other external revenues (fees, subsidies) is also required. The fee can only be applied to internal entities.

3) The external fee requires the filling in of the contractual forms. In addition, the legal representative's IDs of the structure involved must be provided.

4) The fees on the website refer to a timely occupancy of the space. Any special needs, multiple occupancy (that is for more days and more/or more spaces) will be considered on a "package" basis. Any further services can be considered and required through the assistance of external services.

5) Please be advised that any other university internal/external spaces can be also used, subject to special evaluation. Temporary use of the Exhibition Area will be granted under special evaluation conditions and subject to verification of its availability/compatibility with the appointed events scheduling.

6) Please note that the University may suspend or postpone use of the spaces due to circumstances beyond its control, potentially offering an alternative space with the same specifications.

7) We kindly point out that Salone del Rettorato can be assigned to both internal and external structures, only upon request, subject to approval and ad hoc definition of the lump sum price.

Estimates include:

- electricity;
- heating/air conditioning charges;
- availability of equipment in the room/spaces requested;
- regular cleaning service.

The following are not included:

- portorage in case the need for furnishings to be moved was previously and formally authorised;
- technical staff in charge of managing the relevant equipment in the room, whether unexpected;
- anything not specified in the previous list.
