CA' FOSCARI INTERNATIONAL

Ca' Foscari University holds international mobility agreements with partner universities all over the world, and actively participates in numerous European programmes for technological research, education and training. The University has recently strengthened its recruitment strategy in order to attract an international student and faculty body, aiming to constantly improve the quality of teaching and learning.

Ca' Foscari offers tailor-made customized services to its international stakeholders so as to provide a full breadth and level of support to comprehensively integrate them into the university community. In the hopes of furthering its individual goals while also helping to build higher education capacity elsewhere, the University has increased the number of degree programmes held entirely in English and has set up new international research and teaching partnerships, paying particular attention to emerging regions. In addition to the many international Double/Joint Degree Programmes and English-taught Degree Programmes, the "internationalization at home" formula is fostered by the following initiatives.

CA' FOSCARI INTERNATIONAL COLLEGE

Ca' Foscari International College is a centre of excellence which attracts high-achieving students from Italy and abroad. The International College provides accommodation to selected students on the Island of San Servolo, an international residential campus located near St. Mark's Square. Students attend degree programmes at Ca' Foscari University and participate in an additional interdisciplinary programme of courses and innovative activities arranged by the College, making it one of the most vibrant cultural and scientific centres in the area. In addition to subsidised accommodation at the College, full and partial merit-based scholarships are awarded as well.

CA' FOSCARI SCHOOL FOR INTERNATIONAL EDUCATION

Ca' Foscari School for International Education offers international students the opportunity to learn about Italian history, language and culture, and provides prospective students with the possibility to take courses in any disciplines that are required in Ca' Foscari degree programmes. Summer Programmes organised by the School in collaboration with prestigious international partners contribute to expanding the learning experience at Ca' Foscari for local and international students.

INTERNATIONAL PARTNERSHIPS

From its foundation in 1868 as a Royal Business College with a specific focus on Eastern and Western languages, Ca' Foscari has a long and distinguished vocation towards the outer world. Its international profile is defined by its several international partners all over the world and by the quality of the international programmes that are offered to students.

Ca' Foscari University recognizes international mobility as a precious tool for the development of scientific and cultural knowledge, as well as an instrument for individual and professional growth. Therefore, the University seeks to promote outgoing mobility for its students, researchers, professors and administrative staff by joining the most important international mobility programmes and by developing bilateral relations with other universities and international firms and institutions.

UNIVERSITY PROFILE

Established in 1868 as the first Business School in Italy, Ca' Foscari University of Venice is now one of Italy's best universities, encompassing a vast and varied array of undergraduate and graduate degrees, in addition to numerous Doctoral programmes and a wide selection of 1st and 2nd level Professional Master's Programmes.

The university experience enjoyed by Ca' Foscari students every day takes place in an international environment where focus is placed on the most innovative aspects of research, new teaching technologies and methods are openly sought, where cultural events bring students together and where links to future employment are solidly and effectively created.

EUROPEAN CREDIT TRANSFER AND ACCUMULATION SYSTEM (ECTS)

The European Credit Transfer System (ECTS) is a system for transferring university credits throughout Europe. It is based on the clarity and transparency of the students' plans of study and on the assignment of appropriate credits for the completed work. The objective of this system is to guarantee that credits for the courses and exams taken during the period spent abroad are granted and recognised according to clear rules. Rules are based on precise agreements which are regulated by mechanisms that are common to all the institutions participating in the Programme, and students are advised before leaving. In accordance with European directives, Ca' Foscari University of Venice has established that the equivalence of credits is 1 CFU = 1 ECTS.

For further information on grade conversions, visit:
www.unive.it > English > How To > International mobility > Outgoing mobility > Studying abroad > Recognition of study-abroad periods > ECTS Tables for grade conversion

For information on the ECTS system, visit:
www.crui.it/crui/ECTS/english/index.htm

CA' FOSCARI FOR YOU

YOUR APPLICATION

- 1) Check the pre-enrolment system procedure for international students on the Ca' Foscari web site:
www.unive.it/evaluation
- 2) Non-EU nationals will need a visa in order to stay in the European Union for more than 90 days in any 180-day period. Some country nationals will need a visa for entry. Check with the Italian Embassy or Consulate in your country to make sure you comply with visa regulations.

- 3) Make an appointment with the International Welcome Desk:
www.unive.it/welcome

YOUR ARRIVAL IN VENICE

The Ca' Foscari International Welcome Desk offers a wide range of services for international students before their arrival. Keep in touch with your tutor, read your Welcome Guide, get involved in the "Buddy Program", and join the activities during the Welcome Day organized for you! Discover your University, and get off to a good start, learning and living at Ca' Foscari.

ARE YOU LOOKING FOR ACCOMMODATION IN VENICE?

The Housing office acts as an intermediary by matching your needs and preferences with accommodation available and may be able to help you look for a temporary lodging as a starting point prior to finding more suitable accommodation in Venice.

Further details are available here:
Ca' Foscari International:
www.unive.it/international
Facebook:

ADMISSION TO UNDER- GRADUATE STUDIES

QUALIFICATIONS

In order to enrol in any undergraduate degree programme, students must hold a University Entrance Qualification. For students who have finished high school in Italy:

Diploma di maturità quinquennale (Italian five-year high school certificate);

Diploma di maturità quadriennale con anno integrativo (Italian four-year high school certificate plus additional year of studies);

Diploma di maturità quadriennale (Italian four-year high school certificate) issued by teacher training college where the requirement for an additional year is no longer in use. In this case will be required to pass an Additional Learning Requirement for the students (see below).

For students who have completed their high school studies abroad, the UEQ must be a valid qualification which allows admission to University in the country where it was obtained.

ADDITIONAL LEARNING REQUIREMENTS (OFAs)

Students must be properly prepared to embark upon their chosen Degree programme, and must therefore ensure that they have the basic requisites – the knowledge necessary to follow their chosen pathway successfully. If you do not hold all entrance requirements, you will be required to meet the Additional Learning Requirements (“OFA”) and will have the opportunity to take tests. Although students failing to pass OFA tests will still be able to enrol in their chosen Degree, they will be required to take remedial courses organised by the University, and will then sit further tests (these vary according to the Degree programme in question) in order to demonstrate they have attained the level of knowledge requested for the specific Degree programme. In some cases these OFA tests need to be passed within a certain time-frame, otherwise you will be unable to sit any further exams.

OFAs have no impact on the number of credits that students are required to obtain during their studies, nor on their mean grade: OFA tests result in a pass/fail only.

ADMISSION

There are two types of admission to undergraduate programmes: limited and open admission (“accesso programmato” and “accesso libero”). Students applying for limited admission programmes are ranked following a selection process prior to enrolment and must therefore receive confirmation of acceptance before enrolling. Students applying for open admission programmes enrol directly and can then take tests for any outstanding Additional Learning Requirements (OFAs) required by the specific Degree programme within certain time limits. Please note that enrolment for NON-EU students residing outside Italy is subject to quotas. For further details, please visit www.unive.it/enrolment and the relevant webpage of each degree programme.

LANGUAGE REQUISITES

All undergraduate programmes require a minimum of B1 level English, and certain programmes require B2 (see the individual degree listings). Students lacking certification are required to fulfil an Additional Learning Requirement (OFA) in English following enrolment and have one year to complete the requirement.

If you are not a native Italian speaker and you intend on taking an Italian-taught undergraduate programme, it is highly recommended that you hold a level B2 in Italian language. Non-EU students residing outside Italy must produce one of the certificates recognised by the Ministry of Education, Universities and Research (MIUR) attesting a B2 level in Italian, or take the Italian language test held at the University prior to the beginning of the academic year. For further information on admission requirements and the enrolment procedure, please see the enrolment section on the University website.

BUSINESS ADMINI- STRATION AND MA- NAGEMENT

This programme prepares students for careers in accounting, marketing, sales and finance within private and public companies. The Economics and Management curriculum combines subjects in management and economics (theory, methods and models), and mathematics and statistics as well as in legal areas. This curriculum also seeks to equip students with useful tools in finding employment in the European and international market and in carrying on to graduate studies.

DEPARTMENT OF MANAGEMENT

CURRICULA

BUSINESS ADMINISTRATION

ECONOMICS AND MANAGEMENT

CONCENTRATIONS:

- Management of enterprises
- Financial intermediation
- Marketing
- Accounting
- Quantitative instruments for enterprises
- Business economics
- Administration, finance and control
- Legal consulting

CAREER OPPORTUNITIES

First Cycle graduates may be employed as managers and consultants in industrial, business, banking, finance and insurance companies and enterprises, both in Italy and abroad. Possible career opportunities include:

- Management and supervision in the private sector
- Human resources
- Workplace organisation
- Accountancy
- Finance
- Sales and distribution
- Marketing

ENTRY REQUIREMENTS AND ADMISSION

Admission is limited to 675 students

There are 15 places reserved for non-EU students residing outside Italy ("quota"), among which there is 1 place for students involved in the Marco Polo Programme

EU Students interested in the Business administration curriculum will be required to take an entrance exam on logic/mathematics and on Italian/general culture. They must also have a certified knowledge of English (at least level B1).

EU Students interested in the Economics and Management curriculum will be required to take an entrance exam on mathematics in English. They must also have a certified knowledge of English (at least level B2).

Non-EU Students interested in both curricula will be required to take an exam via Skype to certify the required competences.

SCIENCES OF SOCIETY AND SOCIAL SERVICE

This programme equips students with a solid grounding in human and social sciences, as well as with specific knowledge and skills in the areas of social work theories, methods and techniques. Graduates are able to read and interpret typical current societal phenomena, and analyse the socio-economic and cultural context, so as to enter into employment within the fields of social intervention and social work. An integral part of the programme are its intensive apprenticeships, led by supervising social workers.

INTERDEPARTMENTAL SCHOOL
OF SOCIAL SCIENCES AND PUBLIC
POLICIES

CAREER OPPORTUNITIES

First Cycle graduates are able to perform social work and intervention activities, operate on the territory on a network basis and comply with roles and duties as defined in the professional profile of social work. First Cycle graduates may obtain access to professional licensing examinations leading to registration on the Italian roll of social workers and, on passing the examination, they gain the qualification of social worker.

Possible career opportunities include:

- Social Work
- Rehabilitation and social integration
- Healthcare
- Welfare
- Education
- Public administration
- Non-governmental and third sector organizations
- Public and private organizations in which professional social work is required

ENTRY REQUIREMENTS AND ADMISSION

Admission is limited to 115 students

There are 15 places reserved for non-EU students residing outside Italy ("quota")

EU Students will be required to take a test assessing their ability to understand, interpret and comment on texts dealing with contemporary, social phenomena and issues. Moreover, a certified knowledge of English language at least at B1 level is required.

Non-EU Students will be required to take an exam via Skype to certify the required competences.

LANGUAGE, CIVILISATION AND THE SCIENCE OF LANGUAGE

DEPARTMENT OF LINGUISTICS
AND COMPARATIVE CULTURAL
STUDIES

This degree programme provides a solid basic grounding in two foreign languages and an intermediate-level knowledge of English, as well as specific skills related to the chosen curriculum. Graduates may operate in various sectors of the national and European employment market within the areas of management and the enhancement of cultural heritage and educational activities at any level.

CURRICULA

INTERNATIONAL POLITICS

LINGUISTICS, PHILOLOGY AND LANGUAGE TEACHING RESEARCH

LITERATURES AND CULTURE

LANGUAGES

Three-year courses:
Albanian, American English, Catalan, Czech, French, German, English, Italian Sign Language (LIS), Latin American Spanish, Modern Greek, Polish, Portuguese and Brazilian Portuguese, Romanian, Russian, Serbo-Croatian, Spanish

Single module courses:
Bulgarian, Slovenian and Basque

CAREER OPPORTUNITIES

The organization of the curricula provides a basis which facilitates access to the workplace in a multicultural society. First-cycle graduates may operate in various sectors of the national and European employment market, in public and private businesses. Possible career opportunities include:

- Foreign language correspondent and similar professions
- Purchasing and stock control
- Public relations
- Commercial organisation
- Hotel administration and similar professions
- Event organisation
- Travel agent
- Tourist guide
- Vocational education teaching
- Museum technician
- Rehabilitation and social integration

ENTRY REQUIREMENTS AND ADMISSION

Admission is open.

There are 12 places reserved for non-EU students residing outside Italy ("quota"), among which there is 1 place for students involved in the Marco Polo Programme.

- Knowledge of English at B1 level is required.
- To attend the course of German language B1 level is required. No exercise classroom will be provided for beginners.
- To attend the course of Anglo-American language B2 level is required. Maximum number of places is defined by the department.

LINGUISTIC AND CULTURAL MEDIATION

This degree programme is characterised by a technical approach to the study of languages and to oral and written mediation. The programme includes linguistic-cultural courses, including liaison interpreting in the two main languages (English and Spanish) and elements of international law and business administration. The programme is based on innovative teaching methods, including the use of language and IT laboratories, and requires students to spend a semester in Spain. Scholarships for graduates will be available in Spain (Tandem Escuela Internacional de Madrid).

INTERDEPARTMENTAL SCHOOL
OF ECONOMICS, LANGUAGES AND
ENTREPRENEURSHIP

CAREER OPPORTUNITIES

First-cycle graduates may find employment as interpreters, experts of commercial relations with domestic and international markets, translators, tour guides, cultural mediators and linguistic mediators in schools. Possible career opportunities include:

- Foreign language correspondent and similar professions
- Advertising
- Commercial agent
- Event organisation
- Tourist guide
- Rehabilitation and social integration
- Communication

ENTRY REQUIREMENTS AND ADMISSION

Admission is limited to 77 students

There are 9 places reserved for non-EU students residing outside Italy ("quota"), among which 5 there are places for students involved in the Marco Polo Programme.

EU Students will be required to take a linguistic-cultural and aptitude entrance exam on Italian/English, and on their general educational background relating to the history and geography of Spanish-speaking countries.

Non-EU Students will be required to take an exam via Skype to certify the required competences.

DOUBLE/JOINT DEGREE

Degree or Double Degree with the University of Hamburg (Germany), the Universidad de Burgos (Spain), Instituto Politécnico de Coimbra (Portugal), Université Paul Verlaine- Metz/ Nancy (France), Université François Rabelais – Tours/Blois (France), Timisoara (Romania), Turun Yliopisto – Turku (Finland). At the end of their studies students receive a double degree in European Computer Science (ECS).

PHILOSOPHY, INTERNATIONAL STUDIES AND ECONOMICS

English

INTERDEPARTMENTAL SCHOOL OF INTERNATIONAL RELATIONS

This degree programme trains graduates to analyse and interpret social, political and economic phenomena with a multi-disciplinary approach and at various levels: through logical-philosophical foundations, through familiarity with international reality and the cultures of various countries and through the instruments of economic sciences for the analysis of a macroeconomic context, market behaviours and economic factors. The course aims to equip students with a flexible education both international and multidisciplinary based on a general vision of the problems of a globalised world with defined geo-political areas. Graduates may find employment as consultants in the international economics field or carry out a profession in international relations with a specialised knowledge of economic-political phenomena and national institutions (at a ministerial or regional level, at the Chamber of Commerce or as industrial representatives), international institutions (OECD, World Bank, FAO, UNESCO etc.), and private companies (examples include export-manager, manager of international relations) fulfilling all assigned duties with autonomy and proactive capabilities.

CAREER OPPORTUNITIES

Possible career opportunities include:

- General administration
- Library and archive services
- Foreign language correspondent and similar professions
- Advertising
- Hotel administration and similar professions

ENTRY REQUIREMENTS AND ADMISSION

Admission is limited to 150 places available.

There are 20 places reserved for non-EU students residing outside Italy ("quota") EU Students will be required to take an entrance exam on logic and on general culture.

Non-EU Students will be required to take an exam via Skype to certify the required competences.

Furthermore, a certified knowledge of the English language at least at B2 level is required.

TECHNO- LOGIES FOR THE CONSER- VATION AND THE RESTO- RATION

INTERDEPARTMENTAL SCHOOL
OF CULTURAL PRODUCTION
AND CONSERVATION OF THE
CULTURAL HERITAGE

This programme trains students to identify the reasons behind the decay of historical-artistic architectural and archaeological works, to define intervention methods, and to directly operate on works and artefacts in order to guarantee their conservation. Graduates may operate as experts in diagnostics and conservation of cultural heritage within institutions which specialise in cultural heritage management and conservation, as well as local bodies, companies and organisations operating in these fields.

CAREER OPPORTUNITIES

First Cycle graduates in Conservation and Restoration Technologies may find career opportunities as experts in diagnostics and conservation of cultural heritage within institutions dealing with the management and conservation of cultural heritage.

Possible career opportunities include:

- Museum technician
- Art conservation and restoration specialist
- Arts administration
- Heritage management
- Galleries
- Research and teaching

ENTRY REQUIREMENTS AND ADMISSION

Admission is open.

You will be required to take an entrance exam on logic/mathematics. Furthermore, a certified knowledge of the English language at least at B1 level is required.

There are 15 places reserved for non-EU students residing outside Italy ("quota").

SUSTAINABLE CHEMISTRY AND TECHNOLOGY

This programme produces graduates equipped with an adequate basic knowledge of mathematics, physics and chemistry who are able to accurately and fully use the language of chemistry, manage resources and processes of transformation and enhancement of raw materials and their products on a sustainable basis, as well as understand the principles governing the materials' characteristics. Graduates represent an ideal professional figure to profitably act as an interface with two cultures: sustainable production and development. Their knowledge may be successfully applied in producing, transforming and selling traditional and advanced products and materials, thus contributing to developing a 'green and sustainable' chemical industry.

- Sustainable Chemistry and Technology 

ADMISSION TO GRADUATE STUDIES

QUALIFICATIONS

In order to enrol in any graduate degree programme, you are required to have successfully completed a University academic qualification (of at least three years), or a post-secondary school qualification (of at least three years) awarded by a non-university higher education institution which is considered sufficient to allow entry to higher level university studies in the country where it was obtained.

ADDITIONAL ENTRANCE REQUIREMENTS

Students must be properly prepared to embark upon their chosen graduate degree programme, and must have the knowledge necessary to follow their chosen pathway successfully. All students (Italian, EU citizens, non-EU citizens) with non-Italian qualifications must request an online Evaluation of their credentials and requisites before enrolling. Once you have uploaded your documents, the Degree Programme Committee (Collegio Didattico) for your Degree programme will check that you have the relevant requisites and you will be advised of any entry requirements you must fulfil in order to be able to complete your enrolment.

Enrolment for NON-EU students residing outside Italy is subject to quotas. For further details, please visit www.unive.it/enrolment and the relevant webpage of each degree programme.

ADMISSION

There are two types of admission to graduate programmes: limited and open admission ("accesso programmato" and "accesso libero"). Students applying for limited admission programmes are ranked following a selection process prior to enrolment, and must therefore receive confirmation of acceptance before enrolling. Students applying for open admission programmes enrol directly, and can then take tests for any outstanding Additional Learning Requirements (OFAs) required by the specific Degree programme within certain time limits.

LANGUAGE REQUISITES

All graduate programmes require a minimum of B2 level of English and students must provide certification at the moment of enrolment unless otherwise specified under the individual degree listing.

If you are not a native Italian speaker, and you intend on taking an Italian-taught undergraduate programme, it is highly recommended that you hold a level B2 in Italian language. Non-EU students residing outside of Italy must produce one of the certificates recognised by the Ministry of Education, Universities and Research (MIUR) attesting a B2 level in Italian, or take the Italian language test held at the University prior to the beginning of the academic year.

For further information on admission requirements and the enrolment procedure, please see the enrolment section on the University website.

ACCOUNT- TING AND FINANCE

This graduate programme produces experts in accounting data, planning management control systems, setting out finance strategies and auditing business risk. It offers any necessary effective grounding in order to operate within companies and local authorities in positions related to corporate accounting, finance and management control. Graduates may also be employed at consulting companies or work on a self-employed basis.

DEPARTMENT OF MANAGEMENT

CURRICULA

ADMINISTRATIVE CONSULTANCY

BUSINESS
ADMINISTRATION

CAREER OPPORTUNITIES

This MA Degree Programme offers any necessary effective grounding to operate within companies and local authorities, holding positions related to corporate accounting and finance including management control. Possible career opportunities include:

- Management and supervision in the private sector
- Accountancy
- Tax professional
- Corporate finance
- Finance and Business consulting

ADMISSION

Admission is limited to 270 students (180 for the Administrative Consultancy curriculum and 90 for the Business Administration curriculum).

Admission to the programme is subjected to the evaluation of the minimum curricular requirements and personal preparation, which is checked through the admission test.

EU students will be required to take the entrance exam on both general knowledge of Economics and on specific knowledge relevant to their chosen curriculum.

Non-EU Students interested in both curricula will be required to take an exam via Skype to certify the required competences.

A certified knowledge of English at minimum level B2 is required.

There are 5 places reserved for non-EU students residing outside Italy ("quota"), among which 1 place is for students involved in the Marco Polo Programme

CULTURAL ANTHRO- POLOGY, ETHNO- LOGY, AN- THROPO- LOGICAL LINGUI- STICS

DEPARTMENT OF HUMANITIES

In this graduate programme students analyse the current phase of rapid cultural transformation (migratory phenomena, post-colonial and neocolonial situations, new syntheses resulting therefrom), acquiring ethnographic and ethnolinguistic skills, and reflecting on the methods and consequences of the intervention of anthropologists. Students with an undergraduate degree in Asian languages have the possibility of continuing their language studies (Hebrew, Arabic, Armenian, Georgian, Turkish, Persian, Hindi, Chinese, Japanese). Graduates may find employment in local government or in international organisations and NGOs, or in institutions involved in the enhancement of cultural heritage, in social, educational, healthcare and school services, or in regional planning, co-operation and development, with a special focus on immigration issues.

CURRICULA

Graduates may hold positions of high responsibility in structures in charge of the cultural heritage enhancement, of social, educational, healthcare and school services, of regional planning, of co-operation and development, with a special focus on immigration issues.

Possible career opportunities include:

- Anthropologist
- Linguist or Philologist
- Museum curation and conservation
- Journalism
- Public service
- National and international institutions
- NGOs
- Local governments

CAREER OPPORTUNITIES

- Anthropologist
- Linguist or Philologist
- Museum curation and conservation

ADMISSION

Admission is open, subject to assessment of minimum background requirements.

A certified knowledge of English at minimum level B2 is also required.

There are 20 places reserved for non-EU students residing outside Italy ("quota"), among which 2 places are for students involved in the Marco Polo Programme.

WORK, SOCIAL CI- TIZENSHIP AND IN- TERCUL- TURALITY

SCHOOL OF SOCIAL SCIENCES AND PUBLIC POLICIES

This graduate programme provides students with a specialisation in issues related to inequalities, citizenship rights, multiculturalism and social policies. Students can choose to follow a curriculum in social welfare and social policies (policies analysis and evaluation of welfare and public health services, globalisation processes, social welfare transformations) or a curriculum in multiculturalism (migrations, multiculturalism, racial discrimination). The programme also provides a 250 hour internship (both in Italy and abroad), coordinated by social assistant supervisors. Graduates may find employment in the areas of planning, research, analysis and intervention in bodies, administration and institutions that operate within the field of social work and social and health services. They may also work in the processing and implementation of social equity policies, initiatives and measures aiming at fighting conditions of social discrimination and exclusion, or in creating and developing projects for the social and working inclusion and integration of immigrant populations.

CAREER OPPORTUNITIES

Second cycle graduates may perform functions of planning, research, analysis and intervention in bodies, administration and institutions that operate within the field of social work and social and health services. Second cycle graduates may also operate as professionals on a self-employed basis and have access to professional licensing examinations leading to registration on the Italian roll of social workers and, once the examination has been passed, they gain the qualification of social worker.

Possible career opportunities include:

- Public administration management
- Sociologist
- Social worker
- Social programme manager
- Healthcare
- Welfare and education
- Administration, management
- National and international organizations and institutions

ADMISSION

Admission is open, subject to assessment of minimum background requirements.

There are 10 places reserved for non-EU students residing outside Italy ("quota").

PHILOSOPHICAL SCIENCES

This degree programme develops and refines the necessary skills (analysis, understanding in their theoretical foundations and historical extent, arguing for/against) in dealing with the main traditional and contemporary philosophical issues (whether ethical, political, scientific or artistic). The framework allows for philosophy to systematically confront ethical, political and religious themes and issues connected with art and its various expressions, forms and ways of communication (whether linguistic or not).

DEPARTMENT OF PHILOSOPHY
AND CULTURAL HERITAGE

CURRICULA

PHILOSOPHY

EDUCATIONAL COUNSELLING AND TRAINING

CAREER OPPORTUNITIES

Graduates may turn to advanced studies in the field of philosophical and social analysis and educational counselling. Graduates can also pursue their studies and attend a first-level Professional Master Programme dealing with philosophy and philosophical counselling as well as science of cognition and educational training. Students interested in teaching at secondary schools have to obtain a Master's degree and a further teaching qualification as by law.

Possible career opportunities include:

- Work organization
- Text editing and publishing
- Human resources
- Philosopher
- Journalism and the media
- Law
- Business Consultancy
- Education and research
- Advertising
- Communication

ADMISSION

Admission is open, subject to assessment of minimum background requirements.

There are 10 places reserved for non-EU students residing outside Italy ("quota"), among which 1 place is for students involved in the Marco Polo Programme-Libraries.

RELIGIOUS STUDIES

DEPARTMENT OF ASIAN AND NORTH AFRICAN STUDIES

This inter-university graduate programme produces specialists in the study of religious traditions who are equipped with sound knowledge of literary sources, languages, historical events and cultures related to these traditions. It focuses in particular on the religious traditions of the Mediterranean area, Near East, India and Eastern Asia and particular attention is paid to philological-linguistic skills for direct reading and critical study of the sources. Graduates may be employed as social workers and experts in the various sectors of inter-religious relations and communications, including in multi-confessional social contexts. Graduates may also collaborate with public and private schools in carrying out training activities for teachers, students or parents in order to illustrate the different cultural and religious traditions.

CAREER OPPORTUNITIES

Graduates may be employed as social workers and experts in the various sectors of inter-religious relations and communications and of multi-confessional social contexts, in public and private organisations. They may also hold positions of responsibility in Italian and international study or research centres on religion, in religious publishing or within publishing companies in charge of special series or specific interest in the religious sphere, in institutes of religious studies. They may enter into agreements with public and private schools of any level for carrying out training activities intended for teachers, students or parents, in order to illustrate the different cultural and religious traditions, complementing the standard study curriculum.

Possible career opportunities include:

- Expert on religion and theology
- Education and research
- Publishing
- Journalism
- Charity sector
- Public service

ADMISSION

Admission is open, subject to assessment of minimum background requirements.

CROSSING THE ME- D I T E R - R A N E A N : TOWARDS I N V E S T - M E N T A N D I N T E - G R A T I O N (M I M)

DEPARTMENT OF ASIAN AND NORTH AFRICAN STUDIES

The programme aims to prepare a new generation of Mediterranean specialists who are aware of issues affecting the Mediterranean area, capable of balancing contents, practices, ideas and of building links and networks bringing together academic and non-academic worlds (stakeholders, political actors, economic operators, European citizens, and journalists). It intends to offer an in-depth knowledge of the countries on the southern shores of the Mediterranean and of their interaction with contemporary Europe. One of the main aims is to help students acquire a critical awareness of issues concerning the Mediterranean in order to train communication specialists (press, television, cinema, social networks, editorial consultancy), transcultural intermediation experts working for cultural associations and organisations, socio-political experts working for think-tanks tackling Mediterranean issues. The programme is specifically designed to train students in an interdisciplinary context thanks to the collaboration and integration of modules offered by three European universities with competences in the Communication sector (UAB), in European policy studies (UPVM), and in Oriental languages and cultures (Ca' Foscari).

LANGUAGES

French, English, Spanish

CURRICULA

There are no curricula. The study path comprises three modules held in the three partner universities involved (UAB, Ca' Foscari, UPVM) as well as a complementary module held in a Maghreb university (Sousse/Meknès) or at the University of Strasbourg, and a three-month internship.

CAREER OPPORTUNITIES

Possible career opportunities include:

- Expert of the promotion of sustainable development projects in the Mediterranean area
- Expert in Euro-Mediterranean cooperation
- Expert in social, cultural, economic and touristic contexts
- Promoter of exchanges and cooperation

ADMISSION

Admission is limited to 33 students

Students must also have certified English proficiency at B2 level or above and an adequate knowledge of French (B1 level or above).

SCIENCES AND TECHNOLOGIES OF BIO- AND NANO-MATERIALS

DEPARTMENT OF MOLECULAR SCIENCES AND NANOSYSTEMS

This programme provides graduates with a solid multidisciplinary education in physics, chemistry and biology focusing on the characterisation, preparation and application of bio- and nano-structured materials.

CAREER OPPORTUNITIES

Second cycle graduates in Sciences and Technologies of Bio- and Nano-Materials may be employed in all technical sectors, including managerial positions, of companies dealing with manufacturing, processing and development of materials of various nature, both structured and functional. Moreover, graduates may register on the Italian roll of chemists, once the relevant professional licensing examination has been passed.

Possible career opportunities include:

- Chemist and similar professions
- Chemical information management specialist
- Industrial and commercial companies
- Research and development laboratories
- Specialist consultancy

ADMISSION

Admission is open, subject to assessment of minimum background requirements.

There are 8 places reserved for non-EU students residing outside Italy ("quota"), among which 3 places are for students involved in the Marco Polo Programme.

SUSTAINABLE CHEMISTRY AND TECHNOLOGY

DEPARTMENT OF MOLECULAR
SCIENCES AND NANOSYSTEMS

This graduate degree programme focuses on theoretical and experimental chemical sciences. It produces highly qualified chemists who are able to devise original ideas, plan and study new reactions or processes, carry out new molecular and material synthesis, set up innovative and complex analytical methods.

CURRICULA

CHEMISTRY

INDUSTRIAL CHEMISTRY

ENVIRONMENT SUSTAINABLE
CHEMISTRY AND
TECHNOLOGIES
(DOUBLE DEGREE
WITH UNIVERZA
V NOVI GORICI)

English

CAREER OPPORTUNITIES

Second cycle graduates in Sustainable Chemistry and Technology may competently operate, as employees or freelance professionals, in all of the departments of a modern company or a research institute, as well as perform managerial tasks in chemical, both basic and 'fine', and manufacturing industries. Moreover, they may register on the Italian roll of chemists, once the relevant professional licensing examination has been passed.

Possible career opportunities include:

- Chemist and similar professions
- Chemical information management specialist
- Chemical manufacturing
- Process and product design and development
- Research and specialist consultancy
- Government agencies

ADMISSION

Admission is open, subject to assessment of minimum background requirements.

A certified knowledge of English at minimum level B2 is required at enrolment.

There are 8 places reserved for non-EU students residing outside Italy ("quota"), among which 3 places are for students involved in the Marco Polo Programme.

DOUBLE/JOINT DEGREE

Double Degree with Univerza v Novi Gorici (Slovenia).
At the end of their studies students receive a "Laurea Magistrale in Chimica e Tecnologie Sostenibili" from Ca' Foscari University of Venice and an "Okolje 2. Stopnje - Study program Environment" from Univerza v Novi Gorici.

Access: call for applications.

DOC- TORAL PROG- RAM- MES

WHAT IS A PHD?

It is the highest university qualification that a student can achieve. It generally lasts three years and implies study on campus under close supervision, professional training and e-learning schemes. The PhD is awarded to a candidate who has submitted a thesis or dissertation, based on extensive and original research in the chosen field.

HOW TO APPLY

In the Spring Ca' Foscari publishes a call for applications which details all necessary information relating to the application and selection procedures. To be admitted to a PhD programme, candidates must pass a public selection which entails the evaluation of their academic qualifications, as well as an oral and/or written exam(s).

ADMISSION REQUIREMENTS

Candidates must hold a Master's degree and a suitable academic background, as well as a B2 level of English (as per the Common European Framework of Reference for Languages - CEFR). There may be additional entry requirements for certain PhD Programmes.

SCHOLARSHIPS AND FINANCIAL AID

Candidates who achieve top positions in the final ranking are entitled to receive a PhD scholarship. At least 75% of the available places are granted a scholarship.

For further information:
Ca' Foscari Graduate School
graduate.school@unive.it
www.unive.it/graduateschool

ECONOMICS

ECONOMICS

The programme offers an advanced training in economics and finance, providing students with instruments to conduct original research leading to a doctoral dissertation on aspects of the socio-economic systems or the financial markets. Specialisations are offered at quantitative and qualitative levels for both microeconomic and macroeconomic analyses.

LAW, MARKET AND PERSON

This programme aims to educate an “European jurist” in comprehending the Law of our times through a combination of internal and international sources.

MANAGEMENT

This PhD is an international programme designed to train doctoral candidates in different areas of management studies such as: organisational economics and game theory; innovation and entrepreneurship; organisation theory and organisation design; human resource management and competences; marketing; accounting regulation, strategic management, cultural management, behavioural economics, business history, corporate finance; sustainability.

SCIENCE AND MANAGEMENT OF CLIMATE CHANGE

This programme was founded through collaboration with the Euro Mediterranean Center on Climate Change and aims to equip students with a broad and thorough scientific background in economics, in addition to a solid base of original and innovative research on topics regarding the dynamics of climate change, and the methodologies and techniques used in their evaluation and management in terms of mitigation and adaptation measures and policy.

HUMANITIES

ANCIENT HERITAGE STUDIES

This PhD programme takes a united perspective of the antique world and is aimed at utilising specific methodologies and techniques in order to scrutinise the multiple themes and disciplines relevant to historical and interpretive difficulties proposed by monuments and texts.

HISTORICAL, GEOGRAPHICAL AND ANTHROPOLOGICAL STUDIES

This programme is designed to prepare researchers with exceptional competency in the study of the historical phenomena that have characterised European society from the middle ages to the current day.

HISTORY OF ARTS

This PhD programme provides a suitable scientific and professional qualification within the European field for research in art history in all of its accepted meanings, with particular attention being paid to the appreciation of artistic-cultural, territorial and environmental heritage.

ITALIAN STUDIES

This programme aims to ensure students gain complete proficiency in the study of texts dating from the origins of the Italian language to the current day, as well as in the study of works in foreign languages produced in the same historical geographical and cultural contexts.

PHILOSOPHY AND EDUCATIONAL SCIENCES

This PhD programme is a product of the divergence between differing but culturally convergent research, where a philosophical reasoning is intertwined with the social, psychological, cognitive and educational sciences.

LANGUAGES AND LINGUISTICS

ASIAN AND AFRICAN STUDIES

The aim of this PhD programme is to provide advanced knowledge of the field as well as advanced skills in methodology and analysis. The graduate will thus be capable of efficiently and innovatively comprehending the differing phenomena that occur in historical, geographical and cultural dimensions, focusing principally on primary sources within numerous Asian languages.

MODERN LANGUAGES, CULTURES AND SOCIETIES AND LINGUISTICS

This research doctorate is organised into two main subject areas which incorporate languages, language science, literature and culture within numerous scientific and cultural projects: Modern Languages, Cultures and Societies and Linguistics.

SCIENCE

CHEMISTRY

This programme provides students with a broad range of expertise that covers all chemical disciplines and some areas of chemical engineering and biology. Research topics span from classical organic synthesis to nanotechnologies, from green and sustainable chemistry to computational chemistry, among others.

COMPUTER SCIENCE

English

This PhD programme prepares students with the formal tools necessary for rigorously implementing and developing research, allowing them to become experts in the methodologies for planning and evaluation of IT systems and computer systems.

ENVIRONMENTAL SCIENCES

This programme enables students to research solutions to various global issues (environment, ecology, social development, among others) with the aim of promoting an interdisciplinary approach.

PRO- FESSIO- NAL MA STER'S PRO- GRAM- MES

WHAT IS A PROFESSIONAL MASTER'S PROGRAMME?

In the Italian University system framework, first-level or second-level Professional Master's Programmes (in Italian: Master universitari di primo o di secondo livello) involve at least 1 year of postgraduate specialisation or executive education and training. A Professional Master's diploma is awarded, with the acquisition of 60 university credits (ECTS).

HOW TO APPLY

In the spring Ca' Foscari publishes a call for applications which details all necessary information relating to the application and selection procedures.

ADMISSION REQUIREMENTS

A suitable academic background, as well as an undergraduate degree (first cycle/Bachelor's) are required for first-level programmes, and a graduate degree (second cycle/Master's) for second-level programmes

SCHOLARSHIPS AND FINANCIAL AID

Scholarships and loans are available, depending on the selected programme.

FISCALITY, FINANCE AND CONTRACTS

FIRST LEVEL

INTERNAL AUDIT

This Programme is designed to train highly specialised professional figures, combining specific know-how in the areas of internal controls, risk management, compliance, corporate organisational profiles, accounting and financial statements.

INTERNATIONAL BUSINESS, ARBITRATION AND TAX LAW

This programme teaches students about international business and tax law by analysing the economic structure of the main operations and legal issues involved in this area.

SECOND LEVEL

INTERNATIONAL MASTER IN ECONOMICS AND FINANCE

English

The aim of this programme is to train students to acquire a deep and sophisticated knowledge of the economic analysis of markets and financial institutions.

MEDIA, CULTURE & SPORT MANAGEMENT

FIRST LEVEL

CREATIVE DEVELOPMENT AND MANAGEMENT OF CULTURAL ACTIVITIES

This programme offers an innovative path in the field of cultural activities management. It provides strategies in managing a museum, livening up a publishing house, finding funds to finance theatre showings, producing a TV series, amongst others.

FOOD AND WINE CULTURE

This programme offers a multidisciplinary approach in the field of agri-food business. It provides an understanding of historical/cultural and production basics, operational tools and innovative techniques, combining history, geography, anthropology, economics, marketing, legislation and sensory analysis.

SECOND LEVEL

MANAGEMENT OF CULTURAL ASSETS AND ACTIVITIES

 Italian/English/French

This programme was created in partnership with ECSCP Europe with the aim of training professionals capable of developing and managing new culture and arts-based businesses.

SPORT BUSINESS STRATEGIES

 Italian/English

This programme aims to shape managers in commercial, marketing and communication areas: in the sports product businesses, in the field of professional sports and sports event organisation; in commercial and industrial companies using sport as a communication medium or vehicle for their brand image.

SPORTS MANAGEMENT AND MARKETING

 English

The course provides students with the necessary skills, methods and tools to analyse the market and to develop marketing activities for sports clubs and businesses offering goods and services for an increasingly international sports sector.

TOURISM ECONOMICS AND MANAGEMENT

 Italian/English

This programme deals with the promotion of cultural and environmental resources and tourist destinations and involves formal and interactive lectures, contributions from corporate representatives, project work, team activities and case studies.

DIGITAL AND DESIGN STRATEGY INNOVATION

The Master presents a unique fusion not only between technology and culture, but also between science and art. The examination of these different (inter)-disciplinary areas allows the generation of stimuli aimed at the development of entrepreneurial skills and leadership, highlighting their significance in order to generate ideas, transforming them into entrepreneurial projects, and finally arriving at a new start-up or the re-startup of a business.

FINE ARTS IN FILMMAKING

This Master aims to provide students with all the practical and theoretical tools necessary for making a film, in addition to providing multimedia contents for advertising, music and artistic videos. In addition to workshops and theoretical lessons, students will have the opportunity to make a digital film entirely produced within the Master's Programme.

TEACHING AND EDU- CATION

FIRST LEVEL

DIDACTICS AND PROMOTION OF ITALIAN LANGUAGE AND CULTURE TO FOREIGNERS

This course involves two paths: the first for teaching Italian language to foreigners (L2 course) and the second for teaching Italian language (LS course).

TEACHING FOREIGN LANGUAGES

This programme aims to provide students with a solid grounding in foreign language teaching reflecting new developments in the scientific sector and the new professional opportunities emerging in the field of foreign language teaching in all education sectors.

TRANSLATION AND INTERPRETING THEORY AND TECHNIQUES, ITALIAN - ITALIAN SIGN LANGUAGE

This programme aims to provide theoretical and practical training in the fields of translation and interpretation to from and Italian Sign Language - LIS. For this purpose, in-depth knowledge of LIS and Italian language will be provided with a view to interpreting activities.

SECOND LEVEL

ADVANCED PLANNING FOR TEACHING ITALIAN LANGUAGE AND CULTURE TO FOREIGNERS

This programme provides in-depth knowledge of teaching and training methods in addition to equipping students with the organisational and planning skills currently required by the job market, thus developing their ability to plan and monitor training paths.

GLOBAL BUSINESS

FIRST LEVEL

ECONOMICS AND LANGUAGES OF EASTERN EUROPE

 Italian/English/Russian

This programme combines linguistic, economic, and legal expertise in order to create a professional capable of developing productive commercial and cultural relationships between Italian businesses, Russia, and the countries of Eastern Europe.

GLOBAL MANAGEMENT FOR CHINA

 Italian/English/Chinese

This programme aims to shape professionals with the abilities necessary for supporting the management of Italian businesses during integration with the Chinese business environment, and trains consultants which have a wide range of skills pertinent to the development of affairs with China.

GULF ENTERPRISES STUDIES

 Italian/English

This programme shapes new professionals so that they will be capable of operating in a world of private enterprises and public institutions that are part of the internationalisation process, or aspiring to join the process, in the Persian Gulf; a particular focus will be dedicated to the sectors that are of high added value to Made in Italy.

ITALIAN GLOBAL APPROACH TO MANAGEMENT IN INDIA

 Italian/English

This programme is divided into four modules - language, culture, economy, and seminars – and aims to create new professional figures, capable of operating in a world of private businesses and public institutions aspiring to internationalise their activities in the Indian subcontinent.

ENVIRONMENT, SAFETY AND TERRITORY

FIRST LEVEL

ENVIRONMENTAL AND LAND LAW

This programme provides participants with an introduction to basic notions on constitutional and administrative environmental law, and equips them with the necessary tools to comprehend and master the disciplines on the subject.

SCIENCE AND TECHNIQUES OF PREVENTION AND SAFETY

This programme aims to create professionals with high level technical and scientific knowledge and up-to-date competencies and instruments in the field of safety at work, capable of rapidly planning and setting up a reliable and safe organisation in their role as managers of risk prevention and protection services.

SECOND LEVEL

CHARACTERISATION AND REMEDIATION OF CONTAMINATED SITES

 Italian/English

This programme equips participants with the necessary theoretical and practical competencies to handle issues related to the characterisation of contaminated sites. It also aims to define remediation objectives by means of risk analysis procedures, to pinpoint and implement the best available technologies, and to make reliable forecasts regarding intervention costs and times.

SOCIAL STUDIES

FIRST LEVEL

DEMOCRATIC GOVERNANCE

This is a multidisciplinary curriculum offering courses in law, political science, sociology and other fields relevant to the study of democratic governance and human rights.

DIGITAL HUMANITIES

Italian/English

This programme aims to provide training in Digital Humanities for humanities and IT graduates. It will provide technical and professional skills for using, creating and developing IT tools, software and hardware: from creating and processing databases to scanning, digitising and re-processing documents, from data mining to 3D renderings and historical GIS techniques.

GLOBAL ECONOMICS AND SOCIAL AFFAIRS

This programme is organized in collaboration with the International Labour Organization (ILO) in Geneva and has been designed to respond to the demand for the interpretation and government of economic and social phenomena in an era of globalization.

LABOUR AND SOCIAL SECURITY LAW

This programme aims to train experts in labour law with particular emphasis on legal competencies as well as on industrial relations, administration and personnel management issues.

IMMIGRATION: MIGRATORY PHENOMENA AND SOCIAL CHANGE

This Programme is designed to produce new, high-level professionals who hold expertise in immigration phenomena and intercultural relations.

YOGA STUDIES: BODY AND MEDITATION IN ASIAN TRADITIONS

This programme is intended for anyone wishing to approach one of the unexpected mass phenomena of the twenty-first century, from the private individual to regional authorities.

SECOND LEVEL

ANALYSIS AND EVALUATION OF PUBLIC POLICIES

This training programme provides for a high investment in the learning of economic analysis techniques and statistical and econometric methodologies for the ex-post and ex-ante evaluation of public policies.

HEALTH AND SOCIAL ASSESSMENT

This programme is mainly directed at social and health service managers employed by public and private bodies (profit and non-profit) in the areas of healthcare quality assessment, consumer satisfaction assessment, and project assessment.

HEALTH ECONOMICS AND MANAGEMENT

This programme is addressed to officers and executives of public healthcare and welfare authorities operating in the administrative, accounting and management areas of health care services.

MULTI PROFESSIONAL TEAMS IN MEDICINE

This programme addresses the necessity to conciliate humanization and technocracy to develop healthcare as a sustainable process, suggesting a socially-oriented perspective in order for it not to be dominated by technical and economic systems.

PUBLIC ADMINISTRATION

This programme provides the in-depth knowledge necessary to deal with the changing role of public administrations in general, and local authorities in particular. It examines the transformation process from a juridical, economic, managerial, sociological and statistical perspective.

STRATEGIC STUDIES AND INTERNATIONAL SECURITY

Italian/English

This programme is a joint venture with the Institute of Military Maritime Studies. It aims to introduce students to the fundamentals of strategic thought and modern naval studies, with references to classic thinkers and International Law (Maritime, Armed Conflicts, Humanitarian Law).

ACCESS

All students receive a Multiservice Card which provides access to university cafeterias and library services and can also be used as a prepaid card.

All students have access to Wifi in all University buildings.

COME.IN - VENICE (COMMUNITIES GO INTERNATIONAL)

ComE.In - Venice is a point of reference for international students. It aims at enhancing mobility as a resource to stimulate the knowledge and comparison with different cultures, promoting linguistic and intercultural exchange, through moments of socialisation, and the organisation of events, such as screenings of foreign films, themed exhibitions, debates, etc.

cafoscari@comeinvenice.it
www.facebook.com/comeinvenice

ERASMUS STUDENT NETWORK (ESN)

ESN supports and promotes international mobility by providing students with opportunities for cultural understanding and self-development under the principle of 'Students Helping Students'. It organises events and activities to improve socialisation and integration into the university's social and cultural life.

venezia_mam@esn.it
www.esnvenezia.it

STUDENT ASSOCIATIONS

Student associations play a crucial role in bringing together and involving students in university life. Ca' Foscari welcomes them by supporting recreational, training and cultural initiatives and provides funding through special contributions.

associazioni.studenti@unive.it
www.unive.it/associazioni-studenti

ENJOY CA' -- FO --- SCARI, DI --- SCO - VER VENICE

UNIVERSITY SPORTS CENTRE (CUS)

The University Sports Centre (CUS) offers students the opportunity to participate in a wide variety of sports thanks to its own facilities in the city centre and on the mainland.

venescus@unive.it
www.cusvenezia.it

CA' FOSCARI WEB RADIO (RCF)

Ca' Foscari web radio (RCF) is one of the University's new communication tools, created by students for students. Ca' Foscari students have the opportunity to take part in its organisation and running according to individual skills and experience.

venescus@unive.it
www.cusvenezia.it

CA' FOSCARI GUIDED TOUR

A guided tour of the Ca' Foscari palazzo allows you to discover the history of this renowned, gothic building and its main rooms. Ca' Foscari students are not only given the opportunity to take a free tour, but can act as guides and take part in the activities related to this project through a period of internship.

www.unive.it

cafoscartour@unive.it

UNIVERSITY CHOIR AND ORCHESTRA

For more than 25 years the University's choir and orchestra have been offering students the opportunity to start or develop their love for music. The repertoire changes from year to year and ranges from medieval to contemporary music. Choir practice also embraces the study of breathing techniques, singing and solmisation.

corouniv@unive.it

SHYLOCK – UNIVERSITY THEATRE CENTRE (CUT)

Shylock is a cultural association aimed at promoting technical-artistic innovation in the field of theatre. It organises training and experimental workshops, hosts visiting productions and shows, and carries out research and production projects. The activities involve a wide range of disciplines and professional figures.

info@cut.it
www.cut.it

L I F E I N - - V E - - N I C E

Deciding to study at Ca' Foscari means deciding to live in Venice, a city which is like no other. Venice is where past meets innovation. Every day this city offers its residents - majority of which are students - the chance to stimulate their thirst for knowledge through its numerous and varied initiatives. Living Venice is living art, architecture, culture, development, and research. It also means having an environmentally conscious lifestyle, and discovering ancient traditions and different cultures.

One of the most eagerly awaited moments in a Venetian student's day is the so-called aperitivo in campo: from the afternoon until late in the evening, Campo Santa Margherita and Erbaria Rialto turn into venues where people chat, meet others, listen to music and where Venetian spritz and cichetti – the traditional aperitif cocktail and snacks that come with it – are a must.

Venice means a unique chance to meet the whole world in every one of its squares and streets.

LIFE IN VENICE

STUDENT LIFE AND INTERNATIONAL EVENTS

Theatre, Cinema, Music, Literature shows and workshops for the Ca' Foscari community

The International Ca' Foscari Short Film Festival, the first festival in Europe created and organised by a university

Incroci di Civiltà - Cultural Crossroads, the international literary festival of Venice

Ca' Foscari Lectures held by internationally recognised scholars and cultural figures

International exhibitions in the Ca' Foscari Exhibition spaces

Art Night Venezia, a night dedicated to art lovers

Radiocafoscari - the web radio:
www.radiocafoscari.it

Student's Boat Race
Venice Regatta

University Orchestra and Choir
Student associations

OTHER NOT-TO-BEMISSED EVENTS ON THE VENETIAN CALENDAR

Carnival, usually in February, involving all Venetian squares which become a kind of outdoor club with music and parties;

Redentore Festival (Festa del Redentore), a popular local festival, where Saint Mark's basin fills up with local boats and the streets (the so-called 'calli') fill up with sumptuously laid tables for traditionally prepared dinners, awaiting the spectacular fireworks that light up the lagoon;

The Biennale, an international exhibition, for art and architecture lovers, showing art and architectural projects by the greatest contemporary artists (from June to November)

The Venice Film Festival, taking place in September in Lido, where emerging movie directors and influential artists show their new works;
