

Cross Border Transport and Mobility in the EU

Issues and State of the Art

Workshop, Dec. 4/2020

The path towards a barrier-free single European market requires a particular attention to be paid to cross-border transport. In spite of the intense commitment and actions taken by the European Union as well as by national governments and regions, much remains to be done in order to dissolve all the barriers to cross-border mobility of people.

The workshop aims at providing a systematic analysis on what has already been done and what are the next priorities.

9:30 – 9:40 Zoom connection and participants registration

9:45 Welcome and introduction to the workshop: Massimiliano Angelotti, FVG Region, Coordinator of the CROSSMOBY Project
