HPS VENICE - PROGRAM IN THE HISTORY AND PHILOSOPHY OF SCIENCE

We live and develop in a “knowledge society” in which historical and philosophical considerations of science are necessary to understand the present day. As a result of this need, the department is renewing and reinforcing course offerings and research in the history and philosophy of science, promoting a diverse and interdisciplinary perspective with the goal of creating, over time, a community recognized in national and international spheres.

The program includes:

Teaching

The courses bridge between continuity and innovation, combining subjects and expertise both already present in the curricula and to be enacted in the near future.

Bachelor degree

Philosophy of science, Logic, Logic of mathematics, History of science, Historical Epistemology

Masters

Philosophy of Social Science
Political Epistemology
Renaissance Natural Philosophy
Alchemy, Astrology and Magic
History of the Scientific Revolution

Related courses

Bioethics
Social Ethics
History of Logic

Research

The program includes two interdisciplinary and international ERC projects:

- **Knowledge for Use**
www.unive.it/data/16033/
- **Early Modern Cosmology**
www.unive.it/data/16033/

Activities

The program promotes a series of activities to consolidate international exchange and to share results and findings – at a level also accessible to the wider public – derived from the research carried out within the program.
