PROJECT SUMMARY:

With FOR-EU4All, all European University alliances create a Community of Practice (CoP) to help sharing best practices and experiences within the community of all (soon to be) 60+ European Universities alliances, as well as making them transferable for the benefit of the wider higher education sector and other Higher Education Institutions. FOR-EU4All will be the further development, strengthening and scale-up of the existing informal Forum of European Universities (FOR-EU) 1, 2, 3 and 4. FOR-EU4All does not only associate all European Universities alliances, it also associates key stakeholders to take part in the governance, several topical groups and policy learning labs. A significant investment is put into dissemination and communication activities to ensure comprehensive and sustainable collaboration with the wider sector, higher education associations, student associations and higher education institutions that not not part of any Alliance. With a simple, yet effective, structure, FOR-EU4All creates a collaborative and supportive platform where European University alliances come together to identify, share good practices and experiences, support closer cooperation between the alliances by facilitating learning, collaboration, and dissemination of results among and beyond the European Universities alliances to achieve common goals and increase impact by enhancing alliances' knowledge, skills, and effectiveness of the wider higher education sector. FOR-EUA4ll will facilitate a pro-active engagement of European Alliances in policy dialogue with European, national and regional policy-makers.
