TITOLO PROGETTO:

EUROSHELL - Bridging the gap between science and producers to support the European marine mollusc production sector

PROGRAMMA DI FINANZIAMENTO: VII PROGRAMMA QUADRO

BANDO: KBBE.2012.1.2-11

RESPONSABILE SCIENTIFICO : Prof. Roberto Pastres

STRUTTURA (Dipartimento/Centro) : DIPARTIMENTO DI SCIENZE AMBIENTALI, INFORMATICA E STATISTICA

DATI FINANZIARI:

Costo Complessivo del Progetto	Finanziamento Europeo Complessivo Assegnato
€ 894 324	€ 649 983

SINTESI PROGETTO:

EUROSHELL, funded under FP7, will provide solutions to identify current and future challenges facing the shellfish sector, identifying ways to improve the knowledge transfer between science and the sector and making sure that science is applied to the research needs of the sector are key elements to this proposal.

It will focus on identification of the underlying factors that inhibit effective knowledge management in the sector and provide regional forums to facilitate dialogue between shellfish companies (especially through their regional or national producers organizations) and researchers, with a strong focus on developing efficient methodology for knowledge transfer.

This will result in the production of visions for the future of the sector and the identification of key research objectives that could be integrated in the European Aquaculture Technology and Innovation Platform (EATIP) and also provide clear cooperation opportunities with the Fisheries Local Action Groups (FLAGS) of the European Fisheries Areas Network (FARNET) through enhanced methodology for an extension network.

Inizio Attività (previsione)	Fine Attività (previsione)
