**PROJECT ACRONYM AND TITLE:** SSHOC - Social Sciences & Humanities Open Cloud

**FUNDING PROGRAMME:** H2020

**CALL:** H2020-INFRAEOSC-2018-2020

**SCIENTIFIC FIELDS:** European Research Infrastructures, including e-Infrastructures

**HOST DEPARTMENT:** DEC – Department of Economy

**SCIENTIFIC RESPONSIBLE:** Agar Brugiavini

**FINANCIAL DATA:**

<b>Project total costs</b>	<b>Overall funding assigned to UNIVE</b>
<b>€ 14.455.596,25</b>	<b>€ 170.280,00</b>

**ABSTRACT:**

The project aims to provide a full-fledged Social Sciences and Humanities Open Cloud (SSHOC) where data, tools, and training are available and accessible for users of SSH data. The focus of the project is determined by the goal to further the innovation of infrastructural support for digital scholarship, to stimulate multidisciplinary collaboration across the various subfields of SSH and beyond, and to increase the potential for societal impact. The intention is to create a European open cloud ecosystem for social sciences and humanities, consisting of an infrastructural and human component. Development, realisation and maintenance of user-friendly tools & services, covering all aspects of the full research data cycle will be built, taking into account human-centric approach and creating links between people, data, services and training. SSHOC will encourage secure environments for sharing and using sensitive and confidential data. Where relevant, the results of EOSchub H2020 project will be adopted. The SSHOC will contribute to the Open Science agenda and realising the EOSC. This project aligns with prescribed cluster activities in order to realise a SSH cloud that can fully encompass infrastructural support for the study of social and cultural phenomena. Moreover, the planned SSH Cloud is instrumental to Europe's multilingualism; data in Europe is often available in multiple languages thus making a strong incentive for comparative research of the societal and cultural phenomena that are reflected in language use. The SSH Cloud shall contribute to innovations stemming from the coupling of these heterogeneous data types - and work on the Interoperability principle of FAIR.

<b>Planned Start date</b>	<b>Planned End date</b>
<b>1<sup>st</sup> February 2019</b>	<b>31<sup>st</sup> May 2022</b>
