- d) Candidates who have obtained or will obtain their qualification abroad must indicate their average marks for the year preceding that in which they obtained their qualification, using the grading or marking system used in their university of origin.

Art. 5. **TOLC-E or English TOLC-E**

5.1. **General information**

- a) TOLC-E and English-TOLC-E tests are a tool for the orientation and evaluation of initial skills, delivered on a computerised platform and managed by the Interuniversity Consortium of Integrated Access Systems (CISIA). These are individual tests, that differ from student to student, made up of questions automatically and randomly selected from the CISIA TOLC database using proprietary software, created and managed by CISIA. All the TOLC tests generated, of the same type, are of the same difficulty level. The CISIA TOLC database, containing the questions used in the tests, is protected and validated by scientific commissions specifically established by CISIA.
- b) Students admitted to the TOLC test are enrolled in the fourth or fifth year of high school or have already been awarded a diploma.
- c) The TOLC test can be repeated, but only once a month (calendar month).
- d) For the purposes of the selection of this call, the best score of all TOLC-E, English TOLC-E tests taken, will be considered.
- e) The CISIA website (www.cisiaonline.it) offers TOLC test simulations and provides special manuals and mentors to prepare for the test (<http://www.cisiaonline.com>).

5.2. **TOLC modes**

TOLC-E and English-TOLC-E can be sat in both the following modes:

- **TOLC at the University**, every participant sits the test in apposite IT classrooms provided by the University, via CISIA IT platform;
- **TOLC@CASA (TOLC at home)**, every participant sits the test at home, through CISIA IT platform, in virtual, safe and controlled classrooms, where every candidate can be identified and can take the test independently.

5.3. **Test subjects**

- a) The TOLC-E is made up of 36 questions (13 logic, 10 verbal comprehension and 13 maths). There are also 30 questions in English, whose results do not affect the score for the admission covered by this call.

The English TOLC-E is made up of 36 questions (13 logic, 10 verbal comprehension and 13 maths).

The questions on Logic and Verbal Comprehension test the candidates' attitude rather than ascertaining knowledge acquired at high school. Therefore, they do not require specific preliminary preparation.

The maths section includes Number properties and operations on numbers (integers, rational numbers, real numbers). Absolute value. Polynomials (operations, factorisation). Algebraic equations and inequalities of first and second degree or

reducible to these. Powers and roots. Exponentials and logarithms. Calculations with the use of logarithms. Fractional, irrational, logarithmic and exponential rational equations and inequalities. Literal calculation. Practical resolution of simple linear systems. Cartesian coordinates. Equations of straight lines and simple geometric loci (parabola, circumference, hyperbola, ellipse). Graphs of elementary functions.

The TOLC-E lasts 1 hour and 30 minutes. The English section involves an additional 15 minutes; the results of the English section do not affect the evaluation outlined in this call nor does it replace any language assessments required by the degree programme for admission. This section only constitutes a sort of self-assessment for the student and makes the test more interchangeable on national level with other test centres.

The English TOLC-E lasts 1 hour and 30 minutes.

- b) The test result, with the exception of the English language assessment section of the TOLC-E, is determined as follows:
- correct answer 1 point;
 - wrong answer minus 0.25 points;
 - answer not given 0 points.

Art. 6. Sitting the TOLC test
