

My leadership experience

Leadership

SARA BONESSO 08 MARZO 2021 12:22

very useful for myself and my future work

Enriching

Personally I found the contents of this course very helpful and I hope I will have the chance to implement strategies and techniques we learnt so far, if I will be in a leadership position in my working life.

The course encourages me to do my best - every day and in every context - paying a lot of attention to the people around me. It is important to be a leader for our followers, but also for ourselves.

So far this course is one of my favorite one! The course delivered in a very interesting way, easy to understand. All learned material could be easily applied in our different aspects of our life. Big thank you to Professor Sara Bonesso!

A first step for my future

I had never taken part in such a practical course. I have really appreciated the way in which the course has been organized by the professor, the constant exchange of opinions and ideas with my colleagues in the different assignments and the techniques explained to us in order to improve our leadership styles.

I think It is the first step for me to become a better leader and to face challenges in the future!

Learning something for life

I appreciated how practical the course was. I think it is a distinctive feature that the majority of other university

courses lacks, and it is something I always dreamed of. Therefore, I was very pleased with the Leadership course. It was challenging but I feel it has helped me grow and it has given me practical tools, as well as reflections, that I will be able to apply in my life and professional career. I feel more ready now and I am very thankful for this journey. I think this course would be useful for people attending any kind of MSc, and even for people already working!

self-awareness

Through the course lectures and the assignments I was able to analyse my behaviours in group and to become more conscious about my competences. It helped me broaden my mind towards new skills, techniques and abilities, that I will surely bring in my everyday life and working relationships.

It was very useful to improve our self-awareness.

Mind opening, I loved that we used videos to see leadership behaviors in practice instead of just listing characteristics

Experience

It was a very dynamic course that led us to experiment and experience the knowledge acquired.

The course provided the tools to put in practice and evaluate the outcomes.

I was very engaged in my self-assessment and self development.

Self development

Introspection. This course taught me the ability to examine my own experiences and gave me the opportunity to get to know myself better.

Motivating

I've never taken part to a course like the leadership one. All courses usually are focused on the exam, on boring theoretical books and classic style lessons. I appreciated the way in which things were taught to us, in a practical, concrete way, aimed at improving firstly our personal development rather than just taking an exam. It has been very challenging, but I believe that this educational style is more appropriate to stimulate students to grow up.

Being able to build a connection and atmosphere of trust with a stranger and share thoughts and emotions without being judged

encourages personal growth

What I learned is that leadership is all in one package. You need to have all the leadership qualities and styles embedded within you in order to be a good leader.

I have enjoyed whole course and i learnt how to be a good leader and also an learnt leadership qualities to handle team, i really appreciate the way prof has given us activities and entire course were smoothly handled. And also due to pandemic situation we were not able to meet each other, but through this course i met people in online because of activities organized by prof.

I aim at applying the leadership approaches everywhere I go with a conscious attitude towards others

Throughout the course I have learnt how the different behaviors can have strong impacts over the others and help me to reflect a lot on my behaviors with the others, since before I have always avoided to think about the consequences and just act in the way I thought it was more appropriate. Moreover, it helps me to understand the importance of having a suitable leader that is able to adapt himself/herself to each context (people, environment, tasks, activities)

Development

encouraging

Very interesting for our self-development

I will be more active and participative in decision-making processes

Share what I enjoyed most about the leadership course and what you will bring with you into your future
