SKKU-ON

KOREAN STARTER PACK : Beginner & Intermediate

This course introduces Hangeul, basic pronunciation, and essential Korean expressions for everyday communication. Students will develop foundational language skills through practical dialogues and insights into Korean culture.

FINANCIAL MANAGEMENT : Corporate Finance

Learn the fundamentals of corporate finance and how companies make investment, financing, and valuation decisions. Using real-world cases and ESG perspectives, this course connects financial theory with practical business applications.

AI & STORYTELLING : AI-Powered Content Creation

Discover how generative AI is reshaping storytelling through narrative theory, content creation, and emerging technologies. Explore real-world applications as well as the industry, social, and policy challenges of AI-driven storytelling.

MATHEMATICS FOR AI : Basics to Hands-on Coding

This beginner-friendly course introduces the essential mathematics and algorithms that form the foundation of artificial intelligence. Through hands-on coding exercises, students will build practical skills and prepare for further study in AI and data science.
