CALL FOR EXPRESSIONS OF INTEREST

The Department of Molecular Sciences and Nanosystems of **Ca' Foscari University of Venice** is seeking

Full Professor in Material Chemistry and Engineering

Within the framework of the university-wide initiatives “Research for Global Challenges” and “Brain Gain”, the Department of Molecular Sciences and Nanosystems of Ca' Foscari University of Venice is seeking applications to fill a permanent, full-time position of **Full Professor in Material Chemistry and Engineering**. In compliance with the current Italian law, eligible applicants must have been employed as permanent faculty members or research staff **at an equivalent level** by a foreign university or research institute for **at least three consecutive years** by the time of the call deadline.

The selected candidate will have a strong chemistry research curriculum with experience in synthesizing inorganic and hybrid materials with innovative properties and is expected to build and maintain a strong independent research program in advanced materials. Of interest are nanomaterials/biomaterials for applications in biomedical sciences, colloids, assemblies and soft materials, surface science, polymers engineering for green and sustainable applications.

The candidate should also provide an outstanding portfolio of international publications. Experience in leading research groups, conducting/coordinating international projects, and a proven attitude to raise research funding will be particularly valued.

We offer the possibility of leading a multidisciplinary research team, start-up funding, and support in the first two years of the position.

The annual salary is defined by Italian law but some flexibility in the initial level is possible, depending on the candidate experience and seniority.

Knowledge of the Italian language although considered a practical advantage, is not required. Fluency in written and spoken English is required. Regular duties include an annual teaching load of 120 class hours, corresponding to three courses, to students majoring in Chemistry and BioNanoMaterials, but the teaching load can be reduced for the first two years. Service for the Department includes mentoring students.

We however invite candidates with a strong curriculum and research expertise as indicated above to consider the present call for possible near future professorship tenure positions.

Application

Please email your complete CV (together with a complete list of publications) and the mail address of two referents who can be asked for recommendations to segreteria.dsmn@unive.it. Please include an email address and a mobile telephone number within your contact details.

Applications are accepted only in electronic (PDF) form no later than 18/03/2018.
