Project			
Energy efficient Mortgage Market Implementation Plan			
Acronym	EeMMIP		
Length	24 months		
Start	September 1 st , 2020	End	August 31 st , 2022
Funding	Horizon 2020		
Principal Investigator	Monica Billio		
Scientific Area			
Abstract	<p>The Energy Efficient Mortgage Market Implementation Plan (EeMMIP) will build on efforts to develop EEM by delivering an integrated market and a blueprint for established and emerging markets around the globe. The Project will conduct an analysis of the current market systems relevant to the development of an EEM market and establish demonstrators to support the demonstration of the end-to-end customer journey and EEM life-cycle. It will establish market-based governance and an EEM Label to support recognition of and confidence in EEM and facilitate access to quality information for market participants. It will deliver guidance for the inclusion of energy efficiency in credit risk assessments for lending institutions and supervisors and policy recommendations for the prudential framework in line with the principle of risk sensitivity and promote a well-functioning banking market. Finally, it will support global take-up of EEM through the Label and institutional cooperation. EeMMIP responds to the objectives of the EU in the areas of sustainable finance and climate change, all against the background of Capital Markets Union, and aims to influence the entire value chain, from consumer to bond investor, stimulating mentality change and securing energy efficiency in market attitudes and best practices both in Europe and globally.</p>
